

As a National Science Foundation Fellow at Pennsylvania State University, Dr. Holtz received a Ph.D. in Biochemistry followed by a National Science Foundation Postdoctoral Fellowship at Scripps Institution of Oceanography. He was a faculty member at Ohio State University.

Dr. Holtz then founded Holtz Bio-Engineering, a bioprocess development company for the biopharmaceutical business. After nine years of growth, the company was merged into Biosource Technologies, Inc., now Large Scale Biology, in 1989. Dr. Holtz is the Senior Vice President of Biopharmaceutical Development. Dr. Holtz has published over 50 scientific
