

**Peter Beetham, Ph.D.**

**Vice President, Research – Cibus Genetics, LLC.**

Dr. Beetham is VP, Research of Cibus Genetics based in San Diego, CA. Dr Beetham was involved in the original research at Boyce Thompson Institute at Cornell University directed at chimeroplasty (now known as Genoplasty) in plants using RNA/DNA oligonucleotides for gene targeting. Dr. Beetham joined Kimeragen, Inc. in early 1999 as a Senior Scientist in the Plant Industrial Products Division. Currently, the Cibus San Diego facility has recruited a technical team of 10 scientists to work on many aspects of Genoplasty in plants.
