

David Castle is Assistant Professor of Philosophy at the University of Guelph. His research and teaching interests lie in the philosophy of the life sciences, with particular emphasis on evolutionary biology, environmental philosophy and the ethical implications posed by biotechnology. He is a recipient of Ontario Research Development Challenge Fund for the *Program on Applied Ethics and Biotechnology*, and he is a principal investigator on two large-scale Genome Canada Genomics, Ethics, Law and Society (GELS) research programs: *Canadian Program on Genomics and Global Health* and *Bridging the Genomics Divide*. Castle is a member of the Joint Centre for Bioethics at the University of Toronto, and is a Senior Fellow at the University of New Brunswick's Centre for Social Innovation Research. He is co-editor of *Genetically Modified Foods: Debating Biotechnology*, published by Prometheus Press, and *Genomics Policy: Issues and Perspectives for Canada and the Globe*, forthcoming in 2004 from the University of British Columbia Press. He has also published in *Postgraduate Medical Journal*, *Biology and Philosophy*, *Dialectica*, *Ethics and the Environment*, and *Trends in Biotechnology*.
